1960 PUBLIC USE OF NATIONAL WILDLIFE REFUGES

#431

The 10-3/4 million visitors on the National Wildlife Refuges in 1960 represent an 8-percent increase over the visitor-days of public use in 1959. The 10,754,000 visitor-days were divided as follows:

Fishing	31 percent	3,328,500
Hunting	3½ percent	363,500
Miscellaneous	65½ percent	7,062,000

Wildlife observations, picnicking, and swimming were the most popular. Recreation is permitted on designated portions of 140 of the 289 refuges where such coordinated use can be accomplished without defeating the primary objective for which the refuge was established.

The following tabulation of public use, arranged by regions, is based upon information submitted by all refuge managers.
